RIWI Predicts Trump Upset; Triple-Digit Gains Follow

- The following contains forward-looking information and must be read in conjunction with the cautionary statement below -

Toronto, ON – RIWI Corp. (CSE: RIW) (the "Company" or "RIWI") deployed its unique, patented global survey and analytics technology to predict the winner of the 2016 US Presidential election. Based on RIWI's ratiocination, economists, money managers and market experts fine-tuned their opinions.

"On the Friday before the Presidential election, I received the strong data-based indication from RIWI that Mr. Donald J. Trump would be the next President of the United States," said Mr. Manny Weiss, Chairman of Marylebone Diversified LLP based in London, England. "Despite the counter-signals of almost all the pollsters and pundits, RIWI data had it right. The RIWI signal continued to indicate a Trump win up to and including election night," said Mr. Weiss.

From September 12, 2016 to November 8, 2016, RIWI used its award-winning, proprietary data capture and analytic technology to extract and distill relevant and reliable voter predictions by asking Americans which candidate would win the Presidential Election. RIWI subjected more than 147,000 predictions through its patented algorithm that has been widely validated to include broad, diverse representation.

While conventional polling sampling techniques insisted that Democrats would convincingly win the Electoral College, RIWI technology obtained random, anonymous, online and reliable forecasting data.

"Since the vast majority of RIWI respondents in all regions of the world do not typically answer traditional surveys in panel samples, online communities, face-to-face interviews or telephone polls, RIWI's patented ability to engage and survey broad, diverse and random respondents is ideally suited to giving a voice to the unengaged 'silent majority,'" said Neil Seeman, RIWI's Chief Executive Officer.

With this audited demonstration of RIWI's forecasting abilities, RIWI expects its customer base to expand to include clients in risk and finance who need a deeper and more accurate understanding of trends in regional instability. Only proprietary RIWI technology is able to meet this need globally.

"RIWI is developing the practice of deploying its technology for forecasting all important geo-political events around the world, commencing with data on the upcoming December 4th Italian referendum, which has the potential to affect, among other things, market segments, bond yields and currencies," added Mr. Seeman.

About RIWI

RIWI is a global survey technology and risk measurement company using its proprietary, patented methods to capture a new stream of opinion data in any region of the world. For more information, please visit: https://riwi.com/. Profiled in *Nature* and other scholarly journals, RIWI technology is used by governments and global organizations such as The World Bank, the United Nations, leading think-tanks, global NGOs, and by multinational corporations.

CAUTION REGARDING FORWARD LOOKING INFORMATION:

All statements contained in this news release, except for statements of historical fact, that address activities, events or developments the Company expects or anticipates will or may occur in the future is considered "forward looking information" within the meaning of applicable securities laws. These statements are frequently characterized by words such as "plan", "expect", "project", "intend", "believe", "anticipate", "estimate" and other similar words, or statements that certain events or conditions "may" or "will" occur. Forward looking statements in this news release (express or implied) include, but are not limited to, anticipated business and financial growth of the Company, and expectations regarding the use and validity of the Company's products for future applications. There can be no assurance that such forward looking statements will prove to be accurate, as actual results and future events could vary or differ materially from those anticipated in such statements. Accordingly, the reader is cautioned not to place undue reliance on forward-looking statements. The Company undertakes no obligation to update forward-looking information if circumstances or management's estimates or opinions should change except as required by law. More detailed information about potential factors that could affect projected results is included in the documents filed from time to time with the Canadian securities regulatory authorities by the Company.
